Encephalization, Cortical Maps, and Redundancy

If we choose to assert that human intelligence is unique and based on a Darwin-sanctioned continuum deliverable by encephalization, we must accordingly give up discipline (section 3). In 1950 even Lancaster, publicized as Darwinian and Sensory Progress, by John Hopkins Press, 1950.)

Encephalization

The slightly developed complexity of the mind, as evident in Chapter 3, suggests that perfection of this trait could be realized in the existence of a real human or canine species. Encephalization, the increase in brain size relative to body mass and the rule of progressive generation, has also had its massive importance in whatever happens within the body or outside it (Chapter 9), which, in turn, gives prominence that is a source of by messages from its sense organs or to some extent by changes of body chemistry. The role of information-processing in the brain is the most important. Man's superior intelligence is due to the ratio of brain weight to the rest of body (as multiples of 2/3 power).[1]

Increasing in size and in purpose, the mind has to work over shrinking processes that in phylogenetically primitive vertebrates were chiefly governed by lower centers. This is often referred to as the neurological principle of encephalization or neurohistory or in more old papers as the Lorenzian principle of cephalization. Man's brain is not the largest in nature. For example, it is only half the size of the brain of the sperm whale (Physeter catodon), which is about 7,800 grams. The brain of the human male is about 1,400 grams, that of the female about 1,250 grams. The brain of the elephant is about 5,000 grams, that of the dolphin about 1,600 grams, that of the gorilla about 500 grams, that of the chimpanzee about 400 grams, that of the orangutan about 400 grams, that of the gibbon about 100 grams, that of the monkey about 100 grams, that of the lemur about 50 grams, that of the tarsier about 10 grams, that of the mouse about 1 gram, that of the shrew about 0.5 gram, that of the bat about 0.3 gram, that of the hummingbird about 0.2 gram, that of the wren about 0.1 gram, that of the sparrow about 0.05 gram, that of the hummingbird about 0.02 gram, that of the wren about 0.01 gram, that of the sparrow about 0.005 gram, that of the hummingbird about 0.002 gram, that of the wren about 0.001 gram, that of the sparrow about 0.0005 gram, that of the hummingbird about 0.0002 gram, that of the wren about 0.0001 gram, that of the sparrow about 0.00005 gram, that of the hummingbird about 0.00002 gram, that of the wren about 0.00001 gram, that of the sparrow about 0.000005 gram, that of the hummingbird about 0.000002 gram, that of the wren about 0.000001 gram, that of the sparrow about 0.0000005 gram, that of the hummingbird about 0.0000002 gram, that of the wren about 0.0000001 gram, that of the sparrow about 0.00000005 gram, that of the hummingbird about 0.00000002 gram, that of the wren about 0.00000001 gram, that of the sparrow about 0.000000005 gram, that of the hummingbird about 0.000000002 gram, that of the wren about 0.000000001 gram, that of the sparrow about 0.0000000005 gram, that of the hummingbird about 0.0000000002 gram, that of the wren about 0.0000000001 gram, that of the sparrow about 0.00000000005 gram, that of the hummingbird about 0.00000000002 gram, that of the wren about 0.00000000001 gram, that of the sparrow about 0.000000000005 gram, that of the hummingbird about 0.000000000002 gram, that of the wren about 0.000000000001 gram, that of the sparrow about 0.0000000000005 gram, that of the hummingbird about 0.0000000000002 gram, that of the wren about 0.0000000000001 gram, that of the sparrow about 0.00000000000005 gram, that of the hummingbird about 0.00000000000002 gram, that of the wren about 0.00000000000001 gram, that of the sparrow about 0.000000000000005 gram, that of the hummingbird about 0.000000000000002 gram, that of the wren about 0.000000000000001 gram, that of the sparrow about 0.0000000000000005 gram, that of the hummingbird about 0.0000000000000002 gram, that of the wren about 0.0000000000000001 gram, that of the sparrow about 0.00000000000000005 gram, that of the hummingbird about 0.00000000000000002 gram, that of the wren about 0.00000000000000001 gram, that of the sparrow about 0.000000000000000005 gram, that of the hummingbird about 0.000000000000000002 gram, that of the wren about 0.000000000000000001 gram, that of the sparrow about 0.0000000000000000005 gram, that of the hummingbird about 0.0000000000000000002 gram, that of the wren about 0.0000000000000000001 gram, that of the sparrow about 0.00000000000000000005 gram, that of the hummingbird about 0.00000000000000000002 gram, that of the wren about 0.00000000000000000001 gram, that of the sparrow about 0.000000000000000000005 gram, that of the hummingbird about 0.000000000000000000002 gram, that of the wren about 0.000000000000000000001 gram, that of the sparrow about 0.0000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000002 gram, that of the wren about 0.0000000000000000000001 gram, that of the sparrow about 0.00000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000002 gram, that of the wren about 0.00000000000000000000001 gram, that of the sparrow about 0.000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000002 gram, that of the wren about 0.000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000002 gram, that of the wren about 0.0000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000002 gram, that of the wren about 0.00000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000000000000000002 gram, that of the wren about 0.00000000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.000000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.000000000000000000000000000000000000000000000000002 gram, that of the wren about 0.000000000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.0000000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.0000000000000000000000000000000000000000000000000002 gram, that of the wren about 0.0000000000000000000000000000000000000000000000000001 gram, that of the sparrow about 0.00000000000000000000000000000000000000000000000000005 gram, that of the hummingbird about 0.00000000000000000000000000000000000000000000000000002 gram, that of the wren about
